**DETAILED ACTION**

***Examiner's Comment***

The previous grounds of rejection are withdrawn in view of the Board of Patent Appeal decision of reversal on 11/19/2010.

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the present invention is allowable over the prior art for at least the following reasons where the prior art of record fails to teach a fuel injector with a needle valve that sits within a bore that has an axial length and a width where a lower portion of the nozzle housing has a duct that surrounds the lower portion and is positioned in a manner that is closer to the axial bore than the outer radial surface of the nozzle housing and the cooling duct has a height and a width where the cross sectional area of the cooling duct height and the cooling duct width are oriented in a ratio where the ratio of the height of the cooling duct width is 0.25 times the height of the cooling duct where a cooling fluid transfers heat from the needle housing to the cooling fluid to limit thermal expansion of the nozzle housing and the cooling fluid is fed in the housing via a passageway that has an axial portion and an angled portion that connects to the cooling duct where the cooling duct and the passageway are also oriented in a ration where the cooling duct area is twice the cross sectional area of the passageway.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
